

Customer Relationship Management System

Complete customer relationship management solution

Cloudhaz CRM enables you to keep track of the people and companies you do business with, communications with them, opportunities in the pipeline and what needs to be done when.

Let us face it, business software is annoying. Most products are designed for huge companies, which means you end up paying for a million features that you do not want. Even worse, you would need your own IT team to get everything set up correctly. Cloudhaz CRM is designed from the ground up specifically for small businesses, so it is affordable and easy to understand.

Cloudhaz CRM is designed to significantly boost your productivity and give you the core tools you need in order to grow your business. Working your sales pipeline has never been easier. Invite your team to work with you on current opportunities and share [deals](#), [contacts](#), [notes](#) and [tasks](#).

Access from any device

Cloudhaz CRM is entirely web-based, which means that you can access it from any computer, tablet or modern smartphone, anywhere in the world. Also, we handle data backups and software updates, so that you do not have to worry about the boring technical stuff anymore.

All of your contact information in one place

With Cloudhaz CRM, you will finally have a place to store everything you need to know about your contacts. Plus, with our simple search feature, you will never have trouble finding a contact again.

Free updates

Since we are constantly working to improve our product, you will get future updates for free. And because Cloudhaz CRM is web-based, we will automatically install these updates for you, so that you can focus on other things.

Always backed up

Stop worrying about losing your data! Our servers are hosted on industry leading infrastructure and we keep two different types of backups, including several copies stored offsite.

Powerful customization

Most CRM systems do not offer enough customization. Cloudhaz CRM gives you complete control and you can set it up in minutes. If you have any questions, just give us a call and we will help you figure out how to customize it in order to fit your needs.

Never let another lead slip between the cracks

Our simple lead report shows you an always up-to-date list of every lead in your pipeline, including the status and priority of the lead. Finally, you can be sure that you and your team are following up with all of your leads.

Support

Cloudhaz CRM is designed to be as simple as possible, but sometimes it helps to talk to a real person. That is what we are here for. You can reach us via phone or Email and we will be happy to help you out.

Save time and money

Cloudhaz CRM is designed to fulfil all the CRM requirements of small businesses, effectively helping them to generate results, while also saving time and money. We understand that small business owners are stretched for time, in addition to a number of other constraints. That apparent time constraint is why we have developed such a product.

Our application is inspired by both GTD and sales principles. GTD (Getting Things Done) is designed around minimising clutter, so that a person has clarity in decision-making. Cloudhaz CRM gives every user - whether in sales, marketing or support - the power to create extraordinary customer relationships.

Looking to manage effectively your customers? [Cloudhaz CRM](#) will do it for you.
